

U-DEK® RANGE

U-DEK® offer a range of routing options. This is achieved through CNC routing the top layer of foam and finishes with bevelled edges to ensure a high quality finish. These colours are available in all our standard dual laminate range.

*Some colour combinations may not be available in all parts of Europe.

MARINE DECKING

U-TREAD™

U-TREAD™ marine decking in moulded Octi and Z patterns is a hardwearing deck tread suitable for floors, gunwales, trailers and general wet areas, improving safety and underfoot comfort when out on the water.

Available in 3mm or 5mm thicknesses. DIY sheets (2m x 1m) are available for purchase.

MARINE DECKING

NANO-DOT™

This anti-slip deck tread with a unique pressed dot pattern with a buff finish is, like all Ultralon® decking solutions, durable and easy to maintain. NANO-DOT™ can be laminated with a contrasting base colour foam and routed for a truly custom look.

Available in 5mm thickness. DIY sheets (2m x 1m) are available for purchase.

MARINE DECKING

U-DEK® SURF GRIP

U-DEK® Surf Grip features all the same benefits as U-TREAD™ marine decking, with a narrower pre machined profile and groove tread pattern making it ideal for jet skis, boats and surfboards.

Available in 5mm thickness. DIY sheets (2000mm x 480mm) are available for purchase.
